

NEW PRODUCT

Hollow Iron Balusters

1/2" Hollow Products

Fitts introduces the next generation of wrought iron balusters with its Hollow Iron system. Many Hollow Iron balusters have been created "oversized" to aid in the cost of manufacturing, but have lost the delicate detail of the ornate twists and baskets. Fitts painstakingly worked to maintain the consistency of its Hollow products to its extensive solid iron baluster offering.

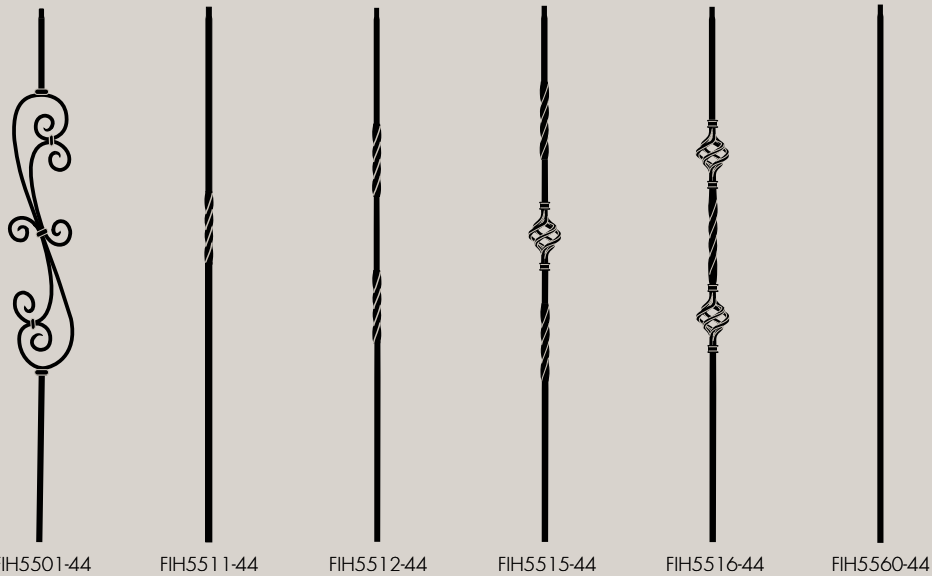

Hollow Iron:

- Cost effective
- Easier to cut and install
- Easier to ship
- Same elegant appearance as solid product

Like Fitts solid iron products, hollow iron is designed to be cut from the bottom. The top has been manufactured with a 1/2" round pin for ease of installation into the handrails and fittings. Hollow Iron balusters are available in: Black, Antique Bronze, Antique Nickel & Rubbed Bronze in the following profiles:

Balusters

FIH5501-44 FIH5511-44 FIH5512-44 FIH5515-44 FIH5516-44 FIH5560-44
